Under Virtoustack Software PVT LTD pune

- I have worked here on typescript ,node js, firebase functions, algolia search integration with firebase firestore ,razorpay webhook handle.
- Developed firebase https functions that worked like api .
- Developed scheduler function which that will update database
- Notifications functions from backend
- Firebase triggers

Programming Languages/skills

Mulesoft

Typescript

Javascript

Nodejs

Python

Java

Flutter

Operating systems

Windows 10 ,

ubuntu , kali ,parrot

Android,

chrome os

Personal Skills

Confident,Team Player

Analytical,Reasoning ability

Excellent presentation skills

Good writing skills

BikeConnect— emergency bike service app

Under Virtoustack Software PVT LTD pune

- I have worked here on typescript ,node js, firebase functions, algolia search integration with firebase firestore ,razorpay webhook handle.
- Developed firebase https functions that worked like api .
- Developed scheduler function which that will update database
- Notifications functions from backend
- Firebase triggers

Mypro— fitness classes app

Under Virtoustack Software PVT LTD pune

- I have worked here on typescript ,node js, firebase function, ,authorize.net payment gateway integration,recursive payment gateway ,Ach payment gateway customized notification handling.
- Developed firebase https functions that worked like api .
- Developed scheduler function which that will update database
- Notifications functions from backend
- Firebase triggers

Bind— ecommerce app

Under Virtoustack Software PVT LTD pune

- I have worked here on typescript ,node js, firebase function, AWS ses ,razorpay webhook handling,xlsx and invoice generation .
- Developed firebase https functions that worked like api .
- Developed scheduler function which that will update database
- Notifications functions from backend
- Firebase triggers

car121— *car selling and buying and much more*

Under Virtoustack Software PVT LTD pune

- I have worked here on typescript ,node js, mongodb, aws s3 bucket, rest api creation
- Bug fix
- Api testing using postman
- Creating routers
- Creating mongodb scheme and models
- Aws s3 bucket integrations
- Aws sqs mailing services
- Implementations of different auth strategies using passport js.

Monnja os— *linux distro(UI) for student*

Collage project

- Setup multiple gui on open linux kernel
- Integrations of parrot security essentials on linux
- Make steam integrations to linux without any third party tools
